

**IT DP dispersant****Dispersant for water-based pigment dispersion of INKJET ink**

《 Acrylic type dispersant 》

**【Features】**

These dispersants have good storage stability.

The dispersions with these dispersants have also good storage stability.

The inkjet inks made from the dispersions used these dispersants have stable printing performance on inkjet printers.

These dispersants can also be used as additive resin in inkjet inks.

These can improve the adhesion of the pigment to the print media and add gloss.

**【Line up & Properties】**

Product Name	Type	Solid Content	Molecular weight	Acid value	Adaptive Pig.
<b>IT DP006</b>	Acrylic resin	50%	< 20,000	70	<b>Magenta pig.</b>
<b>IT DP009</b>	Acrylic resin	40%	< 20,000	115	<b>Blue-pig. Yellow-pig. Black-pig</b>

**【Recommended amount of additive】**

Amount of additive based on pigment: 25% to 100%.
