

## This week's update (week28, 2020)

### ~Stream Jet Printing Solution DM・Card~

This is a UV inkjet printing solution that uses sheet-fed offline operation such as direct mail addressing and printing on cards.

#### ● Sheet-fed offline

Various applications such as direct mail addressing and name imprinting on booklets can be performed at high speed by using a dedicated feeder and transport system that passes postcard size to A4 cut sheets and booklets, and sheets of A3 size and above.

#### Read & Print solution

Read & Print is an option of PCS which is the printer control software of [Stream Jet](#). Read with an external reading camera, search the result from a pre-specified CSV file, send the corresponding page number (line number) by serial communication, and print. This is a must-have feature for personalized direct mail applications.

Application example (The following is an example only)

★Cards

By printing a barcode on the card and pasting it on the mount, it becomes a gift card or membership card with added value.
