

## **SENIOR OLED ENGINEER IN BERLIN, GERMANY (M/F/D)**

**Inuru** is an award winning high-tech company and manufacturer of active packaging and labelling products, that are capable of lighting up, warning on expiry date, displaying small animation and even video in future.

Our products fill the need of brands in the field of Fast-Moving-Consumer-Goods for a personalized brand experience and a better shelf visibility in retail and for home delivery. Amongst Inuru's customers are the most valuable brands worldwide.

In order to support the growth of the company we are searching for an OLED Engineer to be hired from Q4 of 2021.

### **YOUR TASKS**

- Your field is the production of OLED devices by ink jet printing
- You are responsible for the establishment and operation of a high yield production process of OLEDs lighting and displays
- You are responsible for finding the right production parameters and choosing the right materials to realize your goals
- You will identify issues and challenges in the process and develop solutions how to counter this issues
- You will operate ink-jet printing equipment and instruct or supervise team members to do so
- You will coordinate team

### **YOUR SKILLS**

- At best you have proven experience (at 2 years) in the industrial production of OLED lighting or displays, ideally with printing processes
- Ideally you have scaled up production processes in the past and know common challenges and solutions to it
- You have vast experience with printed OLED materials and produced or overseen the production of multiple OLED device stacks
- You are well aware of all the potential degrees of freedom and parameters that can be tweaked during OLED production and are familiar with the interdependencies to achieve the desired outcome
- Experience with De-Mura compensation effects
- Experience working with and maintaining complex electro-mechanical systems
- Ability to dive into leading-edge and highly innovative printing technology and quickly understand mechanical systems, complex software, and processes
- Experience in setting-up and operating vacuum equipment for OLED production and all necessary parameters to achieve industry required OLED parameters
- Self-motivated and creative/innovative
- Data-driven with strong documentation, data analysis, reporting, and communication skills
- Good organization and time management skills
- Strong team player

## OUR OFFER

- After a short work-in period you have the opportunity to lead a small but strong team of international industry professionals to create the Europe's first industrial printed OLED line
- You will work in a full time position working on the world of tomorrow already today, supplying our team with OLED technology to ensure the innovation position of the company
- Bring in new ideas and take responsibility for own projects to grow the company together
- Young diverse team – we are professional but laugh a lot
- Come as you are - work in a truly tolerant, international team
- **No bullshit-culture**
